DEVELOPMENT STUDIES

1 Intro

Hollway et al. ([2017](#)) is an example of an in-text citation. If you use "autocite" (Hollway et al. [2017](#)), then the style will automatically update when you change it's configuration in the TEX file. To learn more about how to use "biblatex", the package we are using here for referencing, see [this cheatsheet](#).

If you want to change fonts, check [here](#).

Math can be inline such as $y = \alpha + \beta x + \epsilon$ or look like this:

$$\bar{x} = \frac{1}{n} \sum_{i=1}^{n} x_i$$

The math might express an equation used in a package. Indeed, you can write whole sections of code like so:

```
model1 <- estimate(y ~  x1 + x2, data)
```
